DETAILED ACTION

Response to Arguments

Applicant's amendments and arguments filed 2/22/07 have been fully considered but they are not persuasive. Regarding the rejection under 35 U.S.C. 102(b) as being anticipated by Harrington (5,893,889), claims 1 and 38, it is the Examiner position that the retention members as noted in the rejection are "movably engaged".

Inventorship

The request to correct the inventorship of this nonprovisional application under 37 CFR 1.48(a) is deficient because:

A statement from each person being added as an inventor and from each person being deleted as an inventor that the error in inventorship occurred without deceptive intention on his or her part as required in § 1.48 Correction of inventorship in a patent application, other than a reissue application, pursuant to 35 U.S.C. 116.

Allowable Subject Matter

Claims 4-30 and 40-45 are allowed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3738

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Harrington (5,893,889).

Harrington teaches:

1. (Original) A vertebral implant apparatus for interposition between two vertebral bodies, the device comprising:

a core member 69 positioned between an outer body 32 and an inner body 34, the outer body comprising a chamber 51 for housing the core member and the inner body comprising a shaft 45 extending at least partially into the chamber, wherein the outer body is movably engaged with the inner body; and

a first retention member 74 (and/or 46) on the outer body and a second retention member 76 (and/or 57) on the inner body, the first retention member cooperating with the second retention member to retain the shaft in the chamber;

wherein responsive to a load applied to the apparatus, the shaft slidably advances into the chamber to at least partially compress the core member between the outer and inner bodies.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3738

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
